

Homework & Practice 1-1

Solve Problems: Add To

Another Look! You can use addition to solve some word problems.

5  play in the grass.

3 more  join them.

How many  are there now?

 $5 + 3 = 8$

7  are on a leaf.

2 more  join them.

How many  are there now?

 $7 + 2 = 9$

Use color tiles to find the total.

HOME ACTIVITY Gather 9 pennies. Tell your child this story: "6 pennies are in a jar. I put 3 more pennies in the jar. How many pennies are there now?" Have your child write and solve an equation to match the number story.

Write an addition equation to match each problem. Use the pictures to help you.

1. 3  are in the pond.

3 more  join them.

How many  are there now?

 $\underline{\quad} + \underline{\quad} = \underline{\quad}$

2. 2  are on a rock.

3 more  join them.

How many  are there now?

 $\underline{\quad} + \underline{\quad} = \underline{\quad}$

Write an addition equation to solve each problem.

3. **MP.4 Model** 2  are sleeping.
4 more  join them.
How many  are there now?

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

4. **MP.4 Model** 5  are on the field. 5 more  roll on the field. How many  are on the field now?

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

5. **Algebra** Read the story. Write the numbers missing from the equation.

3  are sleeping. 2 more  join them.
How many  are there now?

$$\underline{\quad} + 2 = \underline{\quad}$$

6. **Higher Order Thinking** Tell an addition story about the frogs. Then write an equation to show how many in all.

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

7. **Assessment** Which equation describes the picture?

- (A) $3 + 0 = 3$
(B) $2 + 2 = 4$
(C) $3 + 1 = 4$
(D) $3 + 2 = 5$
