

# Homework & Practice 1-2

## Solve Problems: Put Together

**Another Look!** Use the parts to write an addition equation.

I have 2 red counters and 3 yellow counters. These are the parts. I have 5 counters in all.

$$2 + 3$$

$$2 + 3 = 5$$

Greg has 3 red counters and 5 yellow counters. How many counters does he have in all?

$$\begin{array}{r} 3 \\ + 5 \\ \hline \end{array} + \begin{array}{r} 5 \\ + 3 \\ \hline \end{array} = \begin{array}{r} 8 \\ \hline \end{array}$$

**HOME ACTIVITY** Give your child 2 groups of small objects to count (e.g., one group of 3 buttons and one group of 4 buttons of a different color). Together, find the total number of objects and say the corresponding addition equation (e.g., “3 plus 4 equals 7.”). Repeat the activity several times with different groupings.

Write the parts. Then write an addition equation to match each problem.

1. Stephanie has 4 red counters and 2 yellow counters. How many counters does she have in all?

$$\begin{array}{r} \underline{\quad} + \underline{\quad} \\ \underline{\quad} + \underline{\quad} = \underline{\quad} \end{array}$$

2. Glen has 4 red counters and 4 yellow counters. How many counters does he have in all?

$$\begin{array}{r} \underline{\quad} + \underline{\quad} \\ \underline{\quad} + \underline{\quad} = \underline{\quad} \end{array}$$

Write an addition equation for each story.

3. **MP.4 Model** Ian picks 3 🍏. Then he picks 5 more 🍏. How many 🍏 did Ian pick in all?

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

4. **MP.4 Model** Sara has 2 🥚. Jake has 4 🥚. How many 🥚 do they have in all?

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

5. **Higher Order Thinking** Circle 2 groups of fruit. Write an addition equation to tell how many pieces of fruit there are in your 2 groups.

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

6. **Assessment** Which addition equation matches the picture?

- (A)  $4 + 4 = 8$   
(B)  $4 + 5 = 9$   
(C)  $2 + 7 = 9$   
(D)  $4 + 6 = 10$
