

Name _____

Homework & Practice 2-9

Solve Word Problems with Facts to 10

Another Look! You can use pictures to solve a number story.

Linda has 4 buttons.

She buys some more.

?

Now Linda has 7 buttons.

How many buttons did Linda buy?

$$\begin{array}{c} \underline{4} \\ \underline{3} \end{array} \bigoplus \underline{3} = \underline{7}$$

_____ buttons

HOME ACTIVITY Tell your child a story that involves adding or subtracting. Say, "Draw a picture and write an equation for this story." Check to make sure the drawing and the equation match the story. Repeat with 1 or 2 different stories.

Draw a picture to solve. Then write an equation to match.

1. Abby has 6 apples. Judy has 9 apples.

How many more apples does Judy have?

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad}$$

_____ more apples

Write an equation to solve each problem below.

2. Tim has 9 pears.
3 pears are yellow.
The rest are green.
How many pears are green?

___ ○ ___ = ___

3. Ian has 5 red balloons.
Max has 6 blue balloons.
How many balloons do the boys have in all?

___ ○ ___ = ___

4. **Higher Order Thinking** Use the chart. Write a number story. Then write an addition or a subtraction equation to match your story.

Fruit	How Many?
Blueberries	
Raspberries	

___ ○ ___ = ___

5. **Assessment** 7 birds are on a branch. Some birds fly away.
Now there are 4 birds on the branch.
How many birds flew away?

Which subtraction equation matches the story?

(A) $7 - 2 = 5$

(C) $9 - 7 = 2$

(B) $7 - 4 = 3$

(D) $4 - 3 = 1$
