

**Homework  
& Practice 3-10**  
**Critique  
Reasoning**

**Another Look!** Lidia has 10 pennies. Jon has 8 pennies. Sheila says Jon has 2 fewer pennies than Lidia because  $10 - 8 = 2$ .

Do you agree or not agree with Sheila?

Lidia ○○○○○○○○○○○○  
 Jon ○○○○○○○○○○  
 $10 - 8 = 2$

I used a picture and equation to show that Sheila is correct. Jon does have 2 fewer pennies than Lidia. I agree with Sheila.

**HOME ACTIVITY** Take turns writing your own addition problems involving single digit numbers. Show how you solved the problem using objects or pictures. Make mistakes in some of your problems and challenge each other to find the correct work and the mistakes.

Circle your answer. Use pictures, words, or equations to explain.

1. Anna says that  $7 + 4$  is equal to  $3 + 9$  because both are equal to 11. Do you **agree** or **not agree** with Anna?

**Agree**

**Not Agree**

## The Birds

9 birds land on a fence. Some more come. Now there are 18 birds on the fence. How many birds came to the fence?

Max solved the problem. Answer the items below to check his thinking. Use pictures, words, or equations to explain.

2. **MP.3 Explain** Max says that he can use a doubles fact to solve this problem. Do you agree? Explain.
